FUNERAL SHIP HAS ARRIVED

Accounting For 306 Bodies Recovered From Wreck.

MANY ARE BURIED AT SEA.

Number of Dead Bodies Brought To Halifax Was 190.

Halifax, N. S., April 30.—The cable ship Mackay-Bennett, which came into Halifax today with 190 of the White Star liner Titanic's dead, first came to grief over the city by her mere presence as a funeral ship, then sent a shock through those waiting here for bodies with the announcement of her commander that fifty-seven of those reported by wireless as identified had been of necessity been cast again into the sea.

Yet none, not even the few here whose friends or relatives had thus been recommitted to the Atlantic, expressed any criticism of Captain Lardner's action, believing him sincere in his explanation that lack of space on board, shortage of embalming material and the mutilation of bodies were responsible for his course.

The result of the Mackay-Bennett's voyage for the recovery of bodies of Titanic victims may be summarized as follows:

Number of Titanic dead brought to Halifax, 190.

Number of identified dead brought to Halifax, 130.

Unidentified in morgue, 60.

Identified dead buried at sea, 57.

Unidentified dead buried at sea, 59.

Total dead buried at sea, 116.

Total dead found by Mackay-Bennett, 306.

COURT HAS LONG LOAF

Members Take Four Months' Vacation While Docket Remains Crowded.

THE REASON IS NOT CLEAR.

President and Congress Must Sweat Through Hot Summer, But Not Justices.

Washington, April 30.—In the latter part of May the United States Supreme Court will adjourn and enter upon the usual vacation period, which lasts until some time early in October. The justices of this court enjoy the longest vacation of any of the public's servants. The President of the United States theoretically carries on the work of his office all the time. He has his secretaries at the summer capital and emergency business is constantly transacted, although an effort is made to suspend all less important work. In any case he must remain in Washington while Congress is in session. The same is true to a large degree of Cabinet officers. Even members of Congress find it necessary to stay in Washington to attend extra sessions, as witness the long, hot period of last summer. And at home they are often busy. The 30,000 civil service employees in Washington are granted by law thirty days' annual leave. It remains for the Supreme Court justices to take four full months' complete rest on full pay.

There is no particular reason why the justices of the Supreme Court should go away from Washington in May and return in October, neglecting the public business during this period. There is no law giving them this period as a vacation. They are paid full salaries, and are supposed to work full time. During their absence the business of the public is neglected, as witness the fact that the court is nearly two years behind its docket. When the court turns its back on work next month and goes to the pleasant seaside or mountain resorts, it will leave undisposed approximately 730 cases. The number of cases disposed of by the court between the beginning of its sitting last October and up to April, 1912, was 369. When the present term of court began in October, 1911, there were 823 cases pending. During the term and up to April 20, 1912, 268 new cases were filed, making a total of 1,091 cases to be handled, if the court were to clear up its docket before going on vacation. However, the court succeeded only in working down the docket to 722 cases, which number will be somewhat increased by new filings before vacation comes.
